

Slide 1

- Welcome to Using Skype For Beginners! In this class you will learn how to create a Skype account, how to find/add your friends & family and how to Skype video call. If you have any questions, please write them down with the pen and paper provided and we can go over them later.

Slide 2

- Lets start by going to Internet Explorer on the desktop. Once Internet Explorer loads, go to the search bar and type, www.skype.com. Once Skype loads, click on "Join Us" in upper right corner of the page to sign up for a Skype account.

Slide 3

- A "Create a new Skype account" window will open, here you will fill out the fields accordingly to set up your account
- Your password will need to be between 6-20 characters long and consist of letters and numbers
- Since there is a considerable amount of people that use Skype, you may need to choose a Skype name with numbers
- When you are at home with your own PC, when you download the Skype program to your PC, you will need to go to the "Sign in" tab instead of "Create an account" tab You will be using the information you use today at home to download Skype and sign in, so make sure you write down Skype Name and Password for later use.
- Since there is a lot of information to fill out here, we will be coming around and helping each of you with this and explaining some of the things it is asking.
