

Slide 15

Add'l: Safari allows you to browse and open links in separate tabs, which can make it easier to multitask. To navigate to a different tab, tap the one you want. To close a tab, tap the X.

Slide 16

Opening a link in a new tab; If you find a link to a website, you can open that link in a new tab. This allows you to open the site without losing your place on the original page. To open a link in a new tab, tap and hold the link, then select Open in a New Tab.

Slide 17

Sometimes it can be difficult to read webpages in Safari. Luckily, there are two ways to zoom in and out using multi-touch gestures. Double-tap the screen: this gesture will zoom to the area of the screen you tap, which is especially helpful for reading small text. Double-tap again to zoom out. Pinch the screen: this gesture allows you to zoom in and out, offering more control over how large (or small) the page appears. Remember, you can always rotate the iPad to change the screen orientation. Some websites may work well in portrait mode, while other will look

best in landscape mode.

Slide 18

Adding websites to the Home Screen: If you find that you frequently visit the same website again and again, you might want to add the site as a bookmark. But if you want even fast access, you can add an icon to a website on your Home screen. Just tap the Share button, select Add to Home Screen, then click Add.

Slide 19

The page will appear as an icon on your Home screen. When you tap the icon, Safari will open, and the website will appear.
