

Slide 36

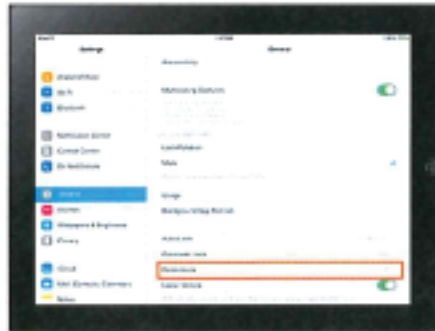

3. Tap Turn Passcode On
4. Use the keypad to enter a four-digit passcode. (You'll need to enter it twice to confirm.)

Slide 37

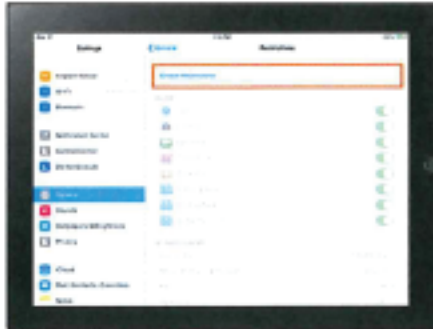

5. Passcode Lock will be enabled. You'll need to enter it whenever you unlock the iPad.

Slide 38

To set restrictions> Restrictions act as parental controls. You can use this feature to set a passcode that will restrict access to certain content. While a passcode lock is used to unlock the iPad, a restriction passcode is used to open specific apps and perform certain tasks. For example, you can restrict explicit music, limit the ability to make in-app purchases or withhold access to important apps. In General, tap Restrictions to view your options.

Slide 39

Tap Enable Restrictions. Use the keypad to enter a four-digit restrictions passcode. (you'll need to enter it twice to confirm)

Restrictions will be enabled. From now on, anyone who uses your iPad will need to enter the passcode to access restricted content.

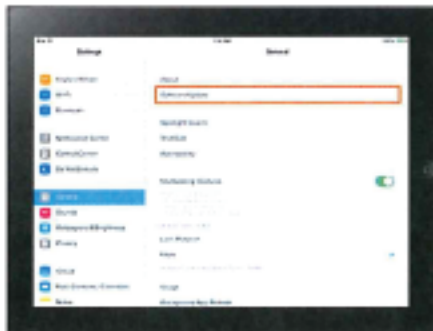

Slide 40

Set the controls to green to allow apps to be used without restrictions. In the example here, you can use the Safari, Camera, Face time, and iBooks apps without restrictions, but you'll need to enter the passcode to open the iTunes Store, install or delete an app, or make in-app purchases.

Scroll down to access more advanced restrictions, such as ratings for music, movie, and apps.

Slide 41

Updating your software, Software Update is where you'll download iOS updates from Apple. Updates include bug fixes and other improvements designed to enhance your experience with the iPad. If an update is available, tap Software Update, then tap the Install button
