10 Gig Internet Is Here!

10 Gig internet is the fastest broadband available for homes and businesses—up to 10,000 Mbps, which is 100 times faster than our standard broadband package! That means lightning-fast downloads, seamless 4K and 8K streaming, smooth online gaming, and the ability for multiple devices to run at full speed without slowing down. For families working, learning, and streaming from home—or businesses relying on large file transfers—10 Gig internet keeps everyone connected without frustration or lag. Simply put, it's the ultimate solution for modern digital life.

What is Phishing?

Phishing is when cybercriminals try to access your information or install malware on your device by getting you to click on a bad link or download an attachment in an email, social media post or message.

To guard against phishing, you must recognize signs of suspicious emails, texts and websites.

Watch for bad grammar and misspellings and urgent or threatening language. Never click on links or download attachments from an unexpected email.

Tech Tip of the month

What is a 404 Error?

Have you ever clicked a link and gotten the message "404 Error?" Don't worry—nothing's wrong with your connection! That simply means the webpage you're trying to reach can't be found. It may have been moved, deleted, or the link might be outdated. It's the Internet's way of saying, "This page doesn't exist." Think of it as dialing a number that's no longer in service. You may need to refresh the page, or go back to the homepage and navigate from there to find what you are looking for.
