Sun Outages

Sun Outages Alert!

Twice a year, solar interference affects satellite signals, causing brief TV disruptions. These sun outages occur when the sun aligns directly behind satellites. During the sun outage, you may experience a pixelated picture, picture freezes, or audio distortions for a brief period of time.

You can expect minor interruptions from the end of February through the beginning of March. Solar satellite interference is out of our control. Please be patient and everything will get back to normal. If you have questions about sun outages, please contact us at 944-5711.

You can drop off most of your old computer equipment at the Solution Center and we will recycle it for you for FREE! Give us a call to find out if your old equipment is eligible, 873-5711.
